

# Disability-Inclusive Project Cycle Management

## Regional Training East Africa

### Brief welcome session:

- 23 November

### Four half days of training:

- 24 & 25 November
- 1 & 2 December

- Virtual via Zoom
- In English
- Reasonable accommodation upon request
- Free of charge

The training primarily targets programme staff of country and local partner organisations of German NGOs working in East Africa.

## Background

Persons with disabilities are often not considered part of the general target group in the humanitarian response. Within the assessment, planning, monitoring and evaluation phase of a project, persons with disabilities are often not consulted nor actively engaged in decision-making. This results in a lack of protection and risks of being excluded from humanitarian services.

Therefore, training will answer the following questions:

- How is disability understood?
- What are the factors that may put persons with disabilities at heightened risk in a humanitarian response?
- What key approaches should humanitarian programmers consider?
- What are key practical recommendations and promising practices?
- What are key resources for an inclusive humanitarian response?

## Methodology

The training will include a mix of input presentations, group and scenario working sessions, plenary discussions, open knowledge and experience exchanges. Following the workshop, participants receive certificates, recordings and training materials.

## Application

Each organisation selects 1-2 staff members who apply through the application form. Successful applicants are selected based on pre-defined criteria and will be informed after the application deadline.

**Application is open: 12 October - 2 November (6pm CEST) [here](#).**
